

## Visualisation – From Animation to Widescreen

KarelCAD has a large range of visualisation tools from Autodesk that are used globally by all industries including animation, movie production, manufacturing, gaming and design visualisation.

No matter what industry you are based in there is a specific design and visualisation toolset to get the best presentation from your designs.

### Design Visualisation

Autodesk design visualisation solutions provide advanced 3D modelling, lighting, rendering, and animation toolsets to handle the most challenging architectural, product, scientific, medical, or industrial projects.

Turn design data into beautiful imagery and bring your presentations to life. Experience industry-leading connectivity and interoperability with Autodesk® 3ds Max® Design software and the industry-leading AutoCAD® and Revit® families of products. [Learn more](#)

### Film

Designed for feature film, digital cinema, and high-definition post-production, our comprehensive Autodesk products and services provide the ultimate high-resolution quality for high-speed compositing, advanced graphics, and interactive client-driven design. [Learn more](#)

### Games

Autodesk's legendary innovation extends beyond creating software for artists, with software and middleware tools for developers—allowing you to take advantage of cutting-edge creativity, productivity, and interoperability throughout your game development process. [Learn more](#)

### Television

Deliver dynamic, high-quality graphics and content without breaking your schedule or budget. Autodesk solutions empower broadcast and commercial editors and artists with a high-performance, innovative, and unmatched creative toolset. [Learn more](#)
